SUMMARY

Business analyst with dual master's degrees in Data Science and Economics. I turn market signals, operating metrics, and messy data into decisions — insight, risk, and investment logic first, models second.

EDUCATION

Master of Data Science · University of British Columbia	GPA 4.23/4.33 · Vancouver · Sep 2023 – Nov 2024
Public Economics (Exchange) · UC Berkeley	GPA 3.7/4.0 · California · Jul 2021 – Aug 2021
M.Sc. Economics · Huazhong University of Science and Technology	GPA 86.7/100 · Wuhan · Sep 2020 – Jun 2023
B.Sc. Economics · Central China Normal University	GPA 88.63/100 · Wuhan · Sep 2016 – Jun 2020

EXPERIENCE

Illuminex AI Apr 2024 – Jun 2024
Data Scientist · UBC MDS Capstone Waterloo, Canada

- Raised bird-strike awareness at Chengdu Shuangliu Airport to 60% mAP — above the prior 49.5% best — so operations could see risk in time to act.
- Built synthetic airfield scenes so the system held up in the real operating environment. Awarded Best Talk in the UBC MDS program.

Beijing Academy of Social Sciences Sep 2019 – Feb 2020
Data Analyst Intern Beijing, China

- Read 20,000+ records for the questions that mattered, lifting student engagement metrics by 12%.
- Built the dashboards senior leadership used to run the operation, supporting a 10% gain in efficiency; sped report queries by 15–20%.

Deloitte Jul 2019 – Aug 2019
Audit and Assurance Intern Shenzhen, China

- Ran financial analysis on Guangshen Railway and Huajun Management — 5,000+ data points, 20% higher assessment accuracy.
- Closed data audits and 15+ executive reports that cut senior review time by 30%.

Zhongshan Securities Apr 2019 – Jun 2019
Investment Banking Intern Shenzhen, China

- Built valuation models from growth, profitability, and competitive position, with 90% accuracy on valuation premiums.
- Tightened due diligence by 20% through a closer read of financials and capital structure.

Agricultural Bank of China Jul 2018 – Aug 2018
Risk Management Intern Qingyuan, China

- Scored 4,000+ auto, mortgage, and consumer loans for customer rating and credit risk, lifting assessment accuracy by 10%.
- Worked with the risk team to fold those findings into the models the desk already used.

SELECTED PROJECTS

SQL Genius Oct 2024 – Feb 2025

- Turns a business question into SQL and a result, so non-technical teammates can get the metric without waiting on a queue.

Churn Insights Jun 2024 – Jul 2024

- Retention economics on 6,000+ records — which segments and behaviors drive attrition (test accuracy 0.829), shown in Tableau.

HomeScope Mar 2024 – Apr 2024

- Interactive market read on what actually moves property value, for investors, planners, and analysts.

SKILLS

Business & markets — KPI analysis, unit economics, valuation, credit risk, investment logic, scenario thinking
Analysis — Python, SQL, R, Tableau, Power BI, statistical inference, A/B testing
Toolkit — PostgreSQL, MySQL, Git, Dash, Shiny, AWS
